Enjoy your time using our website FlightSimPlanet com is supported by a team of aviation enthusiasts.. My advice is to learn and start on something a lot (lot) simpler, and learn how aircraft electrical systems work (via engine, APU and GPU feeds on the EICAS or similar), then understand 'Bleeds' to start engines and hydraulics and you will start to get the right set ups to start and fly the aircraft, as there is no point in watching and copying a video, if you don't know what is actually going on when a switch is switched or used.. I can say about these planes only one idea:fly like professional pilot with professional planes..... I don't know why I can't get gift certificate? I wish I could fly flights like real life 777 pilot.. The battery is always the first thing that you switch on, so yes you will get multiple alarms as the system is confused.. Just invested these 85 in Boing 777 series Problem is allocated to the start up sequences - EVERY time I switch the ground power on, the warning red-light goes on and this terrible 'uh uh' sound contineaus and I cant stop it - not even after take-off many minutes later!Boeing 777 Vs 747No offence Henry but you are trying to run (too fast) before you can actually walk..
